(SE) Skötselråd:
För att ta hand om din möbel på bästa sätt ska du använda vanligt rengöringsmedel till de målade ytorna. Undvik medel som innehåller slipmedel, syror eller ammoniak. På andra ytor som kan vara mer porösa, är det bäst att rengöra med en lätt fuktad trasa och samma milda rengöringsmedel. Inte heller här ska du använda skurpulver eller medel som innehåller slipmedel, syror eller ammoniak. Rengöring av glaset sker med hjälp av, för badrum och ändamålet avsedda rengöringsprodukter. Avtorkning av ytorna bör ske med frottéhanduk eller annat mjukt material. Använd aldrig rengöringsmedel som har en slipande effekt eftersom de kan repa glasytorna.

(NO) Pleie av møblene
For å ta best mulig vare på møblene dine, skal du bruke et vanlig rengjøringsmiddel til de malte flatene. Unngå midler som inneholder slipende eller etsende stoffer, eller salmiakk. Andre overflater kan være mer porøse, og disse er det best å gjøre rent med en lett fuktig klut og samme, milde rengjøringsmiddel. Her skal du heller ikke bruke skurepulver eller midler som inneholder slipende eller etsende stoffer, eller salmiakk. Rengjøring av glasset anbefales rengjøringsmiddel beregnet på badrom uten slipene effekt. Tørk av flatene med frottehåndkle eller annet mykt materiale. Anvend aldri rengjøringsmiddel som har slipene effekt ettersom de kan lage riper i glassflatene.

(DK) Møbelpleje
For den bedst mulige pleje af dine møbler bør du anvende et almindeligt rengøringsmiddel til de malede overflader. Undgå midler, der indeholder slibemiddel, syre eller ammoniak. De andre overflader, der kan være mere sarte, rengøres bedst med en let fugtig klud og samme milde rengøringsmiddel. Også her bør du undgå skurepulver eller midler, der indeholder slibemiddel, syre eller ammoniak. Rengøring af glasset sker med de rengøringsmidler der er beregnet til det. Aftørring af overfladerne bør ske med et frottéhåndklæde eller lignende. Anvend aldrig rengøringsmidler med slibende effekt, da de kan ridse overfladen.

(FI) Kalusteiden hoito
Parhaiten hoidat kalusteitasi käyttämällä maalipintoihin tavallisia puhdistusaineita. Vältä aineita, joissa on hiovia aineksia, happoja tai ammoniakkia. Muut pinnat, jotka voivat olla huokoisempia, on parasta puhdistaa hiukan kostutetulla rievulla ja samalla miedolla puhdistusaineella. Älä käytä näissäkään hankausjauhetta tai aineita, joissa on hiovia aineksia, happoja tai ammoniakkia. Lasin puhdistus tehdään kylpyhuoneisiin tai vastaaviin tiloihin tarkoitetuilla puhdistustuotteilla. Pintojen kuivaus tehdään froteepyhkeellä tai muilla pehmeillä materiaaleilla. Älä käytä hankausaineita tai muita hiovia aineksia sisältäviä aineita sillä ne voivat naarmuttaa lasipintaa.

(GB) Furniture care
For best possible care of your bathroom furniture, use ordinary washing-up liquid for the painted surfaces. Avoid products that contain abrasives, acids or ammonia. Other surfaces that may be more porous are best cleaned by using a moist cloth and the same mild washing-up liquid. In this case, too, do not use scouring powder or products containing abrasives, acids or ammonia. Only recommended products should be used for keeping the glass clean. After use, wipe off water from shower glass with a soft cloth. Never use an abrasive cleaner on the glass as it may cause scratching.
