# Little ones

ecodeco  
the green wallpaper

The 1st eco friendly  
kids collection

**Grandeco Life**

The Little One's collection by GrandecoLife uses the ecodeco™ technology in order to create not only a happy, but also a healthy environment in the nursery, children's room,...

This technology allows us to create healthy wallpaper without PVC. There is no odor or VOC migration into the room. It doesn't contain harmful components and is eco-friendly.

Together with the soft tone colors and attractive designs of the collection this makes Little One's to the first eco-friendly kids collection.

Whether you opt for one of the more outspoken designs (jungle, unicorns, ABC, stars and pinboards) or the more softer ones (Chevron patterns, dots, and stripes) you are now sure that your "Little One" is staying in a healthy room.
